DETAILED ACTION

Response to Amendment

1. Examiner acknowledges the cancellation of claims 15-17, 29 cited in Amendment B dated 10-23-02. Examiner acknowledges the cancellation of claims 1-13 and addition of claims 14-29 cited in Amendment A dated 11-2-00. Claims 14, 18-28 have been examined on their merits.

Response to Arguments

2. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection. It is still unclear what claim 14 is claiming. It becomes a little bit clearer in claim 22 which is comprising a composite comprising a first layer comprising compound Ib or Ic and a second layer comprising the compound Ia. Therefore, still no art has been cited.

Claim Rejections - 35 USC § 112

3. Claims 14, 18-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 is rejected because it is unclear what is meant by "a composition for producing a solid electrolyte, a separator or an electrode in an electrochemical cell, or an electrochromic window, a display, a capacitor or an ion-conducting film in a sensor". It is unclear what is meant by "by weight of a solid (I)". A solid what? It is unclear what (a) is when it is not for an

electrochemical cell because (a) cites “which is insoluble in liquid electrolytes used in said electrochemical cell”. In (b), it is unclear what is meant by “the compound Ib acts as cathode material” because this composition is also used as a material for a solid electrolyte, a separator, etc. which does not contain a “cathode”. Also, in (b), it is unclear what is meant by “the compound Ib acts as an anode material” because this composition is also used as a material for a solid electrolyte, a separator, etc. which does not contain an “anode”.

Claims 23, 25, 26 are rejected because the method steps are not making a solid electrolyte or a separator or a sensor or an electrochromic window or a display or a capacitor or an ion-conducting film because the claim only contains a material which is being crosslinked. For example, a capacitor would comprise two metallic plates and a dielectric.

Claim 27 is rejected because it is unclear what is meant by “defined in claim 25 or a combination of two or more thereof”.

Claim 28 is rejected because it is unclear what is meant by “defined in claim 26 or a combination of two or more thereof”.

Conclusion

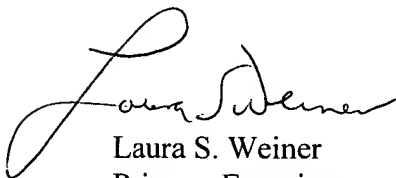

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1745

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
